EXAMINER

LANEAU, RONALD

ART UNIT PAPER NUMBER

3627

DATE MAILED: 01/12/2005

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary	Application No. 09/848,572	Applicant(s) BATES ET AL.	
	Examiner Ronald Laneau	Art Unit 3627	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 24 November 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-10,12-16,20-29 and 42 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1-10,12-16,20-29 and 42 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 11/24/04 has been entered.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-10, 12-16, 20-29 and 42 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tedesco et al (US 6,085,888) in view of Freeny, Jr (US 6,490,443) and further in view of the Japanese patent (JP411039547A) by Koji.

Tedesco et al teach a method of operating a reservation control system for reserving items dispensed by a vending machine comprising the steps of: receiving a reservation request from a vending machine computer for an item (see col. 7, lines 1-13); determining whether the item is available at a vending machine (see col. 6, lines 6-26); and reserving the item by placing a hold on it (see col. 8, lines 3-17 and col. 9, lines 34-50). Tedesco et al further teach the steps of transmitting a message indicating that the reservation request has been accepted and the item is

Art Unit: 3627

reserved for future pickup, along with a message containing a confirmation number (see Fig. 3B). Tedesco et al further teach the step of updating the removing a reservation request upon determining that the item has been purchased from the vending machine (see Fig. 9). Tedesco et al further teach the use of item identifiers (see Fig. 5). Tedesco et al further teaches the step of calculating a service charge, where the charge increases as the length of time of the reservation increases (see Fig. 4).

Tedesco et al do not teach a vending machine network but Freeny, Jr. teaches a computer network that includes vending machines (see Fig. 7), wherein a user can use a computer or wireless telephone to place a vending machine order (see, for example, col. 2, lines 3-46).

Neither Tedesco et al nor Freeny, Jr teaches reserving the item to ensure availability of the item in satisfaction of the reservation request but Koji teaches a system that enables a purchaser to surely purchase a desired article without worrying about the presence/absence of stock by preferentially providing a reserved article to the purchaser who made the reservation (see abstract).

It would have been obvious to employ the teachings of Freeny, Jr. with the invention of Tedesco et al to allow users to employ a network to allow users to use multiple vending machines and to place an order through a computer or wireless phone for convenience. It would have been obvious to one of ordinary skill in the art to utilize ensure the availability of an item or a product as taught by Koji into the combined device of Tedesco et al and Freeny, Jr because it would allow a buyer to get possession of the reserved item even if there is a change in the availability of said item.

Art Unit: 3627

Tedesco et al do not teach data structures, however, data structures are common in the art and it would have been obvious to one of ordinary skill in the art at the time the invention was made to employ data structures to indicate the number of items available, because data structures are an efficient means of storing data.

Response to Arguments

4. Applicant's arguments with respect to claims 1-10, 12-16, 20-29 and 42 have been considered but are moot in view of the new ground(s) of rejection.

Applicant's newly added limitations are met by the newly added Japanese reference (see above).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ronald Laneau whose telephone number is (703) 305-3973. The examiner can normally be reached on Mon-Fri from 8:30am - 6:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert Olszewski can be reached on (703) 308-5183. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
